ProBag™ Barrier System

- ✓ Bags are suspended at alternating levels from the mine roof to maximise coal dust explosion suppression coverage.
- ✓ Uses a hook, ring and dropper suspension system for **easy installation**.
- ✓ **Complies** with QLD RS21.

- ✓ Provides a **comprehensive flame barrier** in the event of an explosion.
- ✓ New **ProDust™** suppressant means fewer barrier bags are now required for even **greater coverage and effect**.
- ✓ Able to be installed **close to the coal face**, negating the 60m minimum distance.
